AIR PROGRAMS REPORTS AND GUIDELINES INDEX

Introduction

The Air Programs Reports and Guidelines Index represents a compilation of current technical and guideline documents prepared by the Office of Air Quality Planning and Standards (OAQPS) over the past several years. It is intended for use by officials of State and local agencies as a companion document to the Air Programs Policy and Guidance Notebook. It will provide information to State and local air pollution control agencies in conducting air quality programs.

The Index is generally organized in terms of sections of the Clean Air Act; the sections are further divided into subject areas. Cross references have been held to a minimum in order to keep the Index concise and easily usable.

A sizable number of documents included in the Index are technical support documents for new source performance standards and hazardous pollutant standards. The technical information therein may be helpful to agencies in implementing such standards and making control technology decisions.

Distribution is being made to EPA Regional Offices and officials of State and local air pollution control agencies. The Index will be updated and distributed about once a year.

Reports listed in the Index will be available as supplies permit from the Library Services Office (MD-35), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711 [Telephone number: (FTS) 629-2777; Commercial (919) 541-2777]; or, for a nominal fee, from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161 [Telephone number: (FTS) 737-4650; Commercial (703) 487-4650].
